

KYOCERA
SHAREPOINT®
CONNECTOR
FOR HEALTHCARE

MAKING THE CONNECTION.

STREAMLINING HEALTHCARE DOCUMENT WORKFLOW.

WITH KYOCERA'S SHAREPOINT CONNECTOR FOR HEALTHCARE, PROCESSES ARE FURTHER STREAMLINED USING PRESET OR CUSTOM WORKFLOWS, FACILITATING THE INDEXING AND ROUTING OF DOCUMENTS TO DESIGNATED SHAREPOINT LIBRARIES.

The healthcare industry - like any other enterprise - must support timely access to information in order to create a collaborative work environment. In years past, hospitals, physician offices and large medical practices relied on e-mail and fax messaging to share patient-related information - medical records, test results, insurance forms and billing data.

While e-mail and fax remain essential, the face of communication in the 21st century has changed, most noticeably in the highly regulated medical sector. Federal mandates regarding information security, specifically Protected Health Information (PHI), have accelerated these changes. For instance, fax machines can no longer be placed near a reception area where others may see confidential documents, and filing cabinets must be under lock and key.

As a result, securing and managing paper-based information, while still enabling seamless access to mission-critical patient records, is an ongoing challenge for healthcare professionals. To address that challenge, healthcare providers often deploy Microsoft SharePoint®, a server-based Enterprise Document Management (EDM) solution that enables medical personnel to access and share up-to-date information. Authorized users can browse their secure SharePoint Document Library from any network PC, making it easy to search the repository for patient information, review appointment records/timelines, and share requested files. These capabilities are critical in fast-paced medical environments.

MANAGING WORKFLOWS FROM START TO FINISH

As one of the world's most popular EDM solutions, Microsoft SharePoint integration with Kyocera multifunctional technology is a logical extension of the powerful Kyocera platform. In fact, Kyocera MFP solutions play a key role in healthcare environments, enabling workers to migrate paper-based information into

cost-efficient electronic processes. With KYOCERA's SharePoint Connector for Healthcare, processes are further streamlined using preset or custom workflows, facilitating the indexing and routing of documents to designated SharePoint Document Libraries.

HyPAS®

Kyocera's HyPAS (Hybrid Platform for Advanced Solutions) is a powerful and scalable software solution platform. It enhances your MFP's core capabilities, integrates seamlessly with all widely accepted software applications, and enhances your specific document imaging processes. With HyPAS, you'll share more information, optimize your resources, and streamline your document workflows.

Using the Single Sign-ons authentication feature provides additional security when logging on to the MFP. Users can access the MFP easily with a single card swipe.

View existing documents and folders on the MFP control panel.

Your institution can create editable file types such as PDF, Word and Excel files using the optional Optical Character Recognition powered by OmniPage® OCR. Its robust capability lets you fully extract content while preserving the format of each element - whether it is text, image or spreadsheet - thus saving you time and increasing your productivity. Digitizing hardcopy files is a simple process from the MFP's touch screen control panel. The indexed document is routed to the selected Document Library where it is immediately available to authorized users, whether around the corner or around the globe.

ITEM CODE	DESCRIPTION
855D200631	SharePoint Connector
855D200632	SharePoint Connector powered by OmniPage® OCR

With KYOCERA's SharePoint Connector for Healthcare, structured content is immediately available to physicians and medical staff alike, enabling them to easily share information, ideas and expertise. When complex workflows are simplified with SharePoint Connector, healthcare organizations have a valuable resource to help their staff make more informed, timely decisions.

BENEFITS OF SHAREPOINT® CONNECTOR FOR HEALTHCARE

- › Increase security with Single Sign-on, which creates an audit trail of who accessed information when users authenticate to the MFP.
- › Easily scroll through a user-created library list for an improved user experience through the new interface.
- › Increase ROI by moving paper-intensive doctor's offices and hospitals to efficient digital workflows, reducing operating expenses and overhead.
- › Enhance usability by linking directly with existing SharePoint folder structures.
- › Ensure greater efficiency and accountability by providing an audit trail for tracking patient records.
- › Enable Kyocera MFPs to serve as an on-demand printing solution, with indexing and retrieval tools.
- › Support automatic document indexing using the optional OCR capabilities for streamlined workflow and greater accuracy.
- › Offer all medical staff full access to patient information, with support for multiple SharePoint servers.
- › Provide a secure, easy-to-deploy platform for rapid integration throughout virtually any medical organization.

SUPPORTED VERSIONS

SharePoint Server 2010, 2013, 2016; SharePoint Online (Office 365)

SYSTEM REQUIREMENTS

Operating Systems

Windows Server 2016, Windows Server 2012 R2, Windows Server 2012, Windows 2008 R2, Windows 10 (32-bit and 64-bit), Windows 8 (32-bit and 64-bit), Windows 7 SP1 (32-bit and 64-bit)

Minimum Hardware Requirements

2 GB of RAM, 2 GHz processor, 5 GB of available hard disk space

Other Software Prerequisites

Microsoft .NET Framework: v.4.6
